

# INFORMATION AND CONSULTING FOR MIGRANT PEOPLE

---

Different people that are doing with groups that complain on the "Immigration law" and who defend the rights of the "sin papeles" are creating a net of information points all around Barcelona in order to attend the immigrant people. There you may find some help that you won't may be able to achieve in the other points that the government has placed on the CCOO, UGT or Càritas offices.

Indeed, this official bureaus are not giving any valuable information as long as they are conceived as a tool for the government only during this new regularization process, not as a tool to be given to the immigrant people. Informations around this regularizations process, about the different working contracts, etc... but first and primary attention in front of some situations that seem to be so complex for the new incoming people, who don't have sometimes any kind of shell for evicting police's persecution or xenophobia.

This informations points are:
